CCP-CC
"Curb Cap"

Standard Features:

- 20ga. G90 min. construction*.
- 2" deep capping lip, plus 1/2" drip edge.
- Light cross break for drainage.
- Standing Seams welded at end, on caps greater than 53" in both direction &/or greater than 113" long.
- * 18ga. min. greater than 40"sq., 16ga. min. for 60"sq.

Optional Features:

1. Heavy Gauge construction.
2. .080 Alum. construction.
3. 18ga. 304 Stainless steel construction.
4. Specail capping depth (specify).
5. No cross break, flat top.
6. 1" duct linear glued & pinned underneath (2" in from all sides).
7. 2" duct linear glued & pinned underneath (2" in from all sides).

NOTES:

These are simply caps to cover existing &/or new curbs.
If equipment is intended to be installed on top, a custom platform cap may need to be submitted, based upon the equipment submittal, for adaquite support & possible intereference with the standing seam.
